PRODUCTION INFO

All of our solid colors are produced domestically. All of our papers are acid and lignin free, and are produced without elemental chlorine.

HELPFUL HINTS

When designing, remember that dark colors may rub off on lighter colors, specifically when mailed. Consider using a layer (such as tissue) between the card and envelopes, or discussing different mailing options such as hand-cancelling.

When printing, remember that all printers react differently with our different papers and shapes. For the best result, look for printers that feed paper straight through – such as top-feed inkjets and lasers with a back door.

* enclosures, pocket folders and outer presentation envelopes are not available in jupiter, mars, sapphire and antique gold
